

presents an illustrated Talk

Cancer is Optional!

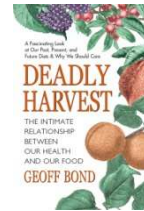

Our evolutionary history gives us revolutionary insights for avoidance and remission.

From London:

Geoff Bond, M.Sc., M.I.C.E., M.I.L., M.I.T.I.

Evolutionary Lifestyle Anthropologist
An international authority on living the way nature intended

Thursday February 12th at 6:00pm

Appetizers and Refreshments will be served

Seating is limited: call (760) 346-4003

The \$20 RSVP Fee supports Genetic Cancer Research in the Desert

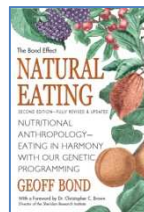

Mirage Medical Group
44-650 Village Court, Suite 100,
Palm Desert, CA 92260

Location map: <http://goo.gl/maps/aSzAs>

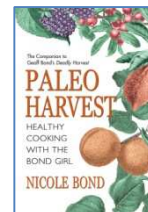

After the talk, Geoff will be signing copies of "Deadly Harvest"

And of the updated edition of his 2000 classic 'Natural Eating'

Nicole, will be signing copies of her companion cookbook 'Paleo Harvest'

Brief Description

Why are people getting cancer in greater numbers than ever before in human history?

Geoff describes how it is due to the MISMATCH between the way we live today and they way nature designed us.

He describes how we know this, what life was like in the birthplace of humanity, what is going wrong now, and what we can do to put it right.

The talk covers the main lifestyle aspects: eating, nutrition, sunlight, sleep, physical activity, the environment and stress.

Geoff will also discuss the misinformation surrounding the role of sunlight in human health.

Anyone practising the principles he describes will restore the body's natural cancer defences and, to help in remission, mobilize its cancer-fighting hit-squads.
