## **Fear Not Cancer:**

*Lessons from evolutionary anthropology give revolutionary insights for avoidance and remission.*

***Geoff Bond, M.Sc.***

**Monday, March 5, 2012, 7:30-8:15 a.m.**

**Scripps Center for Integrative Medicine**

Shiley Pavilion, Lower Level, Yoga Room

10820 North Torrey Pines Road, La Jolla, CA 92037

858-554-3300

The scientific blend of evolutionary lifestyle anthropology with traditional medicine has revealed significant and revolutionary insights about how we respond to cancer as individuals and as a society.

At this lecture you will learn about the science behind this vital dimension of chronic illness and how to implement it into medical practice. These supportive scientific measures can help you transform the health of all your patients, regardless of socio-economic, ethnic or genetic factors.

**Geoff Bond, M. Sc.** graduated with honors in applied sciences from London University and completed post-graduate, professional qualifications in 1968. He spent his early career living and working in remote African villages where he widened his earlier studies in anthropology, biochemistry and evolutionary human development.

Geoff has been an active part of this leading-edge science of evolutionary lifestyle anthropology for more than 20 years. Geoff has become a recognized authority on what it means to be human in lifestyle terms and contributes to the UK Health Policy panel called "Reform." He regularly presents to professional and public audiences about our human origins, our ancient nutritional heritage and what we can do today to live happier and healthier lives.
